

# NEW! NBTI-30

JJM Boiler Works, Inc.

## Acidic pH Injection System

The new NBTI-30 is designed for pH control of acidic condensate flow from large boiler and hot water heating systems.

The NBTI-30 can also be applied to control pH levels in small to medium industrial wastewater drainage systems where code violations are a concern.

JJM's NBTI-30 can control the pH level within .05% of its capacity with recording and feedback monitoring along with BAS communications.

<b>MODEL #</b>	NBTI-30
<b>RATING/MBH</b>	32,000 Max.
<b>FLOW RATE</b>	255 GPH Max.
<b>INLET PORT SIZE</b>	1" NPT
<b>OUTLET PORT SIZE</b>	1"NPT
<b>MOUNTING</b>	Floor
<b>TANK VOLUME</b>	75 U.S. Gallons
<b>ACTIVE INGREDIENT</b>	15 Gallon/25% Caustic Liquid 15 Gallon/50% Caustic Liquid
<b>pH SENSORS</b>	(1) Tank (1) Outlet/Drain
<b>pH CONTROL</b>	Walchem W600/U.L., CSA, IEC, EN/NEMA 4
<b>SCREEN</b>	Touch Screen
<b>pH ACCURACY</b>	+/- .01% of Reading
<b>MEMORY</b>	Data Logging
<b>TANK MIXER</b>	Neptune Propeller/U.L. Listed
<b>APPLICATION</b>	Acidic Condensate/Industrial Acid
<b>TANK MATERIAL</b>	Polypropylene
<b>CAUSTIC METERING PUMP</b>	Iwaki
<b>UBS PORT</b>	Up or Down Load Data

### Electrical Ratings

<b>BREAKER</b>	15 amp
<b>NEPTUNE MOTOR</b>	115/1/60 1/62 amps
<b>IWAKI CAUSTIC METERING PUMP</b>	115/1/60 1.20 amps
<b>WALCHEM CONTROL</b>	100 - 240/1/60 7.0 amps
